

Walker River Brownfields: Old Tribal School Phase I Environmental Site Assessment

September 25, 2022

Environmental Investigations Report Number: 1595.1

Prepared for:

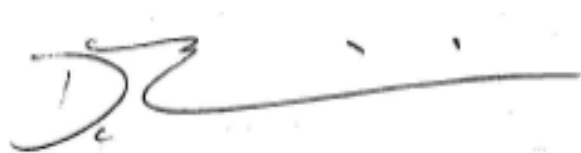

Walker River Paiute Tribe
1022 Hospital Road
Schurz, NV 89427

Prepared by:

McGinnis and Associates
65 Regency Wy, STE C
Reno, NV 89509

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professionals as defined in §312.10 of this part.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

List of Common Acronyms

<i>AUL</i>	Activity and Use Limitations.
<i>CERCLA</i>	Comprehensive Environmental Response, Compensation and Liability Act of 1980 (as amended, 42 U.S.C. §9601 <i>et seq.</i>).
<i>CERCLIS</i>	Comprehensive Environmental Response, Compensation and Liability Information System (maintained by EPA).
<i>CFR</i>	Code of Federal Regulations.
<i>CORRACTS</i>	Facilities subject to Corrective Action under RCRA.
<i>EPA</i>	United States Environmental Protection Agency.
<i>EPCRA</i>	Emergency Planning and Community Right to Know Act ((also known as SARA Title III), 42 U.S.C. §§11001-11050 <i>et seq.</i>).
<i>ERNS</i>	Emergency Response Notification System.
<i>ESA</i>	Environmental Site Assessment (different than environmental compliance audit).
<i>FOIA</i>	U.S. Freedom of Information Act (5 U.S.C. §552 as amended by Public Law No. 104-231, 110 Stat.).
<i>FR</i>	Federal Register.
<i>ICs</i>	Institutional Controls.
<i>LLP</i>	Landowner Liability Protections under the <i>Brownfields Amendments</i>
<i>LUST</i>	Leaking Underground Storage Tank.
<i>MSDS</i>	Material Safety Data Sheet.
<i>NCP</i>	National Contingency Plan.
<i>NFRAP</i>	former CERCLIS sites where no further remedial action is planned under CERCLA.
<i>NPDES</i>	National Pollutant Discharge Elimination System.
<i>NPL</i>	National Priorities List.
<i>PCBs</i>	Polychlorinated Biphenyls.
<i>PRP</i>	Potentially Responsible Party (pursuant to CERCLA 42 U.S.C. §9607(a)).
<i>RCRA</i>	Resource Conservation and Recovery Act (as amended, 42 U.S.C. §§6901 <i>et seq.</i>).
<i>SARA</i>	Superfund Amendments and Reauthorization Act of 1986 (amendment to CERCLA).
<i>TSDF</i>	Hazardous waste treatment, storage, or disposal facility.
<i>USC</i>	United States Code.
<i>USGS</i>	United States Geological Survey.
<i>UST</i>	Underground Storage Tank.

Glossary of Terms

Adjacent property: An adjoining property, or any real property or properties the border of which is contiguous or partially contiguous with that of the subject parcel, or that would be contiguous or partially contiguous with that of the subject parcel but for a street, road, or other public thoroughfare separating them. Adjoining subject parcels are not considered adjacent, as they have been studied individually.

Appropriate inquiry: That inquiry constituting “all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice” as defined in CERCLA, 42 USC § 9601(35)(B), that will give a party to a commercial real estate transaction the *innocent landowner defense* to CERCLA liability (42 USC § 9601(A) and (B) and § 9607(b)(3)), assuming compliance with other elements of the defense.

Approximate minimum search distance: The area for which records must be obtained and reviewed pursuant to Section 7 of ASTM E1527-13 subject to the limitations provided in that section. This may include areas outside of the *subject parcel* and shall be measured to the nearest property boundary. For this project, the approximate minimum search distances utilized were those given in ASTM E1527-13 Section 7.2.1.1.

AUL: Activity and Use Limitations

Comprehensive Environmental Response, Compensation, and Liability Information System: The list of sites compiled by EPA that EPA has investigated or is currently investigating for potential *hazardous substance* contamination for possible inclusion on the *National Priorities List*.

Due diligence: The process of inquiring into the environmental characteristics of a parcel of commercial real estate or other conditions, usually in connection with a commercial real estate transaction. The degree and kind of due diligence vary for different properties and differing purposes.

Environmental lien: A charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products upon a property, including (but not limited to) liens imposed pursuant to CERCLA 42 USC § 9607(1) and similar state or local laws.

Hazardous Substance: A substance defined as a hazardous substance pursuant to CERCLA 42 USC § 9601(14), as interpreted by EPA regulations and the courts: “(A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title, (C) any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Act (42 USC § 6921) (but not including any waste the regulation of which under the Solid Waste Disposal Act (42 USC § 6901 *et seq.*) has been suspended by Act of Congress), (D) any toxic pollutant listed under section 1317(a) of Title 33, (E) any hazardous air pollutant listed under section 112 of the Clean Air Act (42 USC § 7412), and (F) any imminently hazardous chemical substance or mixture with respect to which the Administrator (of EPA) has taken action pursuant to section 2606 of Title 15. The term does not include petroleum, including crude oil or any

fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under subparagraphs (A) through (F) of this paragraph, and the term does not include natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).”

Innocent landowner defense: That defense to CERCLA liability provided in 42 USC § 9601(35) and § 9607(b)(3). One of the requirements to qualify for this defense is that the party makes “all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice.” There are additional requirements to qualify for this defense.

Key site manager: The person identified by the owner of a property as having good knowledge of the uses and physical characteristics of the property. In this project, key site managers were identified primarily as the parcel owner or manager.

National Priorities List: The list compiled by EPA pursuant to CERCLA 42 USC § 9605(a)(8)(B) of properties with the highest priority for cleanup pursuant to EPA’s Hazard Ranking System. See (Code of Federal Regulations) 40 CFR Part 300.

Petroleum products: Those substances included within the meaning of the petroleum exclusion to CERCLA, 42 USC § 9601(14), as interpreted by the courts and EPA, that is: petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under subparagraphs (A) through (F) of 42 USC § 9601(14), natural gas, natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas). The word fraction refers to certain distillates of crude oil, including gasoline, kerosene, jet fuels, and fuel oil, pursuant to Standard Definitions of Petroleum Statistics.

Practically reviewable: Information that is practically reviewable means that the information is provided by the source in a manner and in a form that, upon examination, yields information relevant to the property without the need for extraordinary analysis of irrelevant data. The form of the information shall be such that the user can review the records for a limited geographic area. Refer to ASTM 1527-97 for a more detailed definition of what constitutes practically reviewable information.

Publicly available: Information that is publicly available means that the source of the information allows access to the information by anyone upon request.

RCRA generators: Those persons or entities that generate hazardous wastes as defined and regulated by RCRA.

Reasonably ascertainable/Standard Sources: Availability of record information varies from information source to information source, including governmental jurisdictions. The user of the report or the environmental professional is not obligated to identify, obtain, or review every possible record source that might exist with respect to a property. Instead, ASTM E1527-13 identifies record information that shall be reviewed from standard sources, and the user or environmental professional is required to review only record information that is reasonable ascertainable from those standard sources. Record information that is reasonably ascertainable means (1) information that is publicly available, (2) information that is obtainable from its source within reasonable time and cost constraints, and (3) information that is *practically reviewable*.

Recognized environmental conditions (RECs): The presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimus conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies.

Reliance: An environmental professional is not required to verify independently the information provided by may rely on information provided unless he or she has actual knowledge that certain information is incorrect or unless it is obvious that certain information is incorrect based on other information obtained in the Phase I Environmental Site Assessment or otherwise actually known to the environmental professional.

Site visit: The visit to the property or location during which observations are made constituting the site reconnaissance section of ASTM E1527-13.

Subject Site: A property or specific location that lies within the area studied by the Phase 1.

Visually and/or physically observed: During a site visit, this term means observations made by vision while walking through a property and the structures located on it and observations made by the sense of smell, particularly observations of noxious or foul odors.

1. Environmental Site Assessment Summary

Figure 1. The old Walker River Tribal school as seen from Cottonwood Lane.

1.1. Introduction

A Phase I Environmental Site Assessment (ESA) was performed in conformance with the American Society of Testing and Materials (ASTM) Practice E1527-13 (“Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process”, 2013) for the site known as the “old school” located on the Walker River Reservation (Figure 1). The purpose of this practice is to define good commercial and customary practice in the United States of America for conducting an environmental site assessment of a property with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and petroleum products. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability (hereinafter, the “landowner liability protections,” or “LLPs”): that is, the practice that constitutes “all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or and customary practice. The purpose of performing the ESA is to identify recognized environmental conditions (RECs) in connection with the subject site.

Figure 2. Google Earth view of the subject site marked with a yellow pin.

1.2. Purpose

The results of the environmental assessments presented in this report are intended to identify recognized environmental conditions including the presence of hazardous substances or petroleum products that lie within the subject site area or adjacent properties. Recognized environmental conditions are defined as the likely presence of any hazardous substance or petroleum products on a property under conditions that indicate an existing, past, or potential release of products into structures or into the ground or groundwater of the property. The site assessment covers the land and any site improvements, such as buildings, that lie within the subject site area. Recognized environmental sites were also identified within 1 mile of the subject sites including detailed descriptions of known sites. Physical settings of the site and area were also reviewed including the location of private and public water wells, soil types, flood zones, wetlands, earthquake faults power line locations and streets, railroad tracks and bridges.

1.3. Special Terms and Conditions

No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property. Performance of this Phase I Environmental Site Assessment is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a property.

A Phase I Environmental Site Assessment is a practice that is site-specific in that it relates to the assessment of environmental conditions on a specific parcel of real estate or subject site. Consequently, this practice does not address many additional issues raised in transactions such as

purchases of business entities, or interests therein, or of their assets, that may well involve environmental liabilities pertaining to properties previously owned or operated or other offsite environmental liabilities.

Information in this Phase I Environmental Site Assessment report is limited to data that is considered practically reviewable. This includes data from source agencies where the information is provided in a manner and in a form that, upon examination, yields information relevant to the property without the need for extraordinary analysis of irrelevant data. Public records are considered practically reviewable if records can be obtained from the source agency by location references, such as address, parcel number, or zip code. If records are not readily available based on a location reference, they are not considered practically reviewable.

This Phase I is intended to provide an initial environmental assessment of tribal properties that have been designated as EPA Brownfields sites. The assessment warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the protocol. These methodologies are described by the standard as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. These findings and conclusions contain all limitations inherent in these methodologies which are referred to in the protocol.

1.4. Use by Third Parties

This report was prepared pursuant to the contract between the environmental professionals (EP) and the Client. That contractual relationship included an exchange of information about the project area that was unique and between the EP and its Client and serves as the basis upon which this report was prepared. Because of the importance of the communication between the EP and its Client, reliance or any use of this report by anyone other than the Client, for whom it was prepared, is prohibited and, therefore, not foreseeable to the EP.

Reliance or use by any such third party without the explicit authorization in the report does not make said third party a third-party beneficiary to the EP's contract with the Client. Any such unauthorized reliance on or use of this report, including any of its information or conclusions, will be at the third party's risk. For the same reasons, no warranties, or representatives, expressed or implied in this report, are made to any such third party.

2. Information Sources and Methodology

The methodology used to perform Environmental Site Assessments for parcels within the project area adheres to ASTM guidelines "Standard Practice for Environmental Site Assessments; Phase I Environmental Site Assessment Process," designation E1527-13. A review of environmental regulatory databases and documents was performed to identify environmental issues in the project area and surrounding vicinity.

2.1. Project Area Information Sources

Sections 3 through 5 of this report provide background information and general assessment data that is applicable to the project area and surrounding vicinity. Section 3 is property specific information such as history and ownership, Sanborn maps, aerial photographs and topographic

maps, and site reconnaissance and interviews. Section 4 includes information on the physical setting of the site and vicinity including soil type, groundwater conditions, soil and groundwater contamination in the area, and water well locations. Table 1 provides a summary of information sources that were used by the EP to gather general information for these sections.

Table 1. Sources used by the EP for the Environmental Site Assessment.

Information Source	Comments
USGS 7.5 Minute Topographic Map	Quadrangle
EDR Environmental Data Resources	Federal, State, and local environmental database within 1 mile of the site
CERCLIS Federal EPA	Superfund site list
RCRA NonGen / NLR	EPA database including information on generation, treatment, handling, and disposal of hazardous wastes
FINDS	Facility Index System, assigns an EPA ID number to facility
The Sanborn Library	Sanborn maps

2.2. Regulatory Records Review Information Sources

A records review was performed by the EP to obtain information on the site physical and environmental conditions. This data was sourced from the federal, state, county and city agencies listed in Table 1. A commercial search company, Environmental Data Resources (EDR), was used to obtain information on site records from listed agencies in Table 2 and from the Sanborn Fire Insurance Map Company, USGS topographic maps, and other sources.

2.3. EDR Regulatory Records Review

A search of available environmental records was conducted by a private search firm called Environmental Data Resources (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) and the ASTM Standard Practice for Environmental Site Assessments E1527-13.

The following federal and state regulatory agency databases were reviewed by EDR and EP staff and found to contain at least 1 record per database type within the 1-mile search radius for the agencies listed. A summary list of the record names is included in Appendix E along with more detailed individual information. Figure 3 is a map of the records found within a 1-mile radius of the subject site, location within the 1-mile radius, the direction of each record in relation to the subject site and the relative elevation from the subject site. Table 2 is a summary of the records located by agency and the number of records found within 1 mile of the subject site.

Table 2. Agency databases with records found on and within 1 mile of the subject site.

Record Type	Environmental Record	Number	Distance
Standard Environmental Records	SEMS	1	< 0.5 mi
	INDIAN UST	1	< 0.25 mi
Additional Environmental Records	INDIAN RESERV	1	Subject Site
Total Records			3

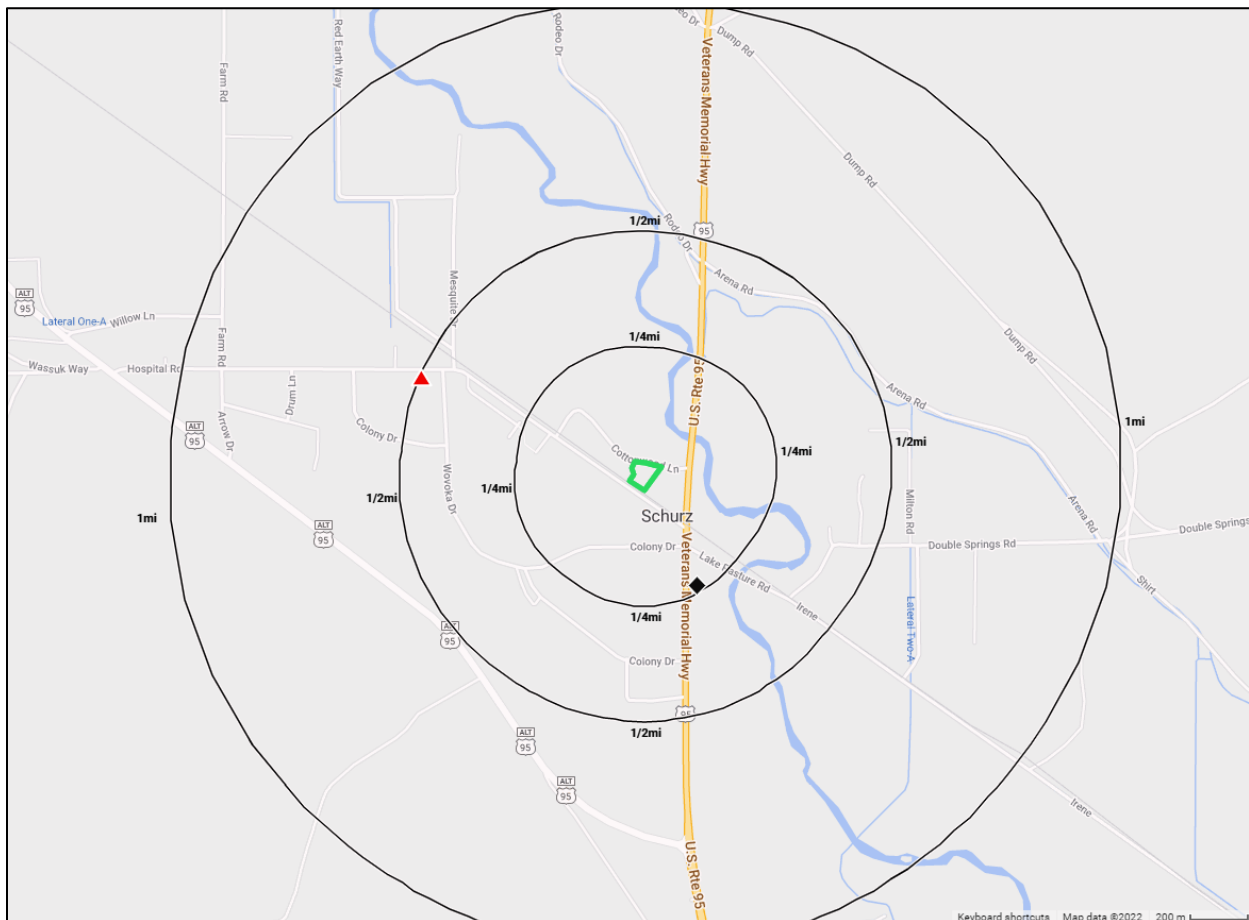

Figure 3. Map of sites found within 1 mile of the subject site.

- SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA’s Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies, and private persons, pursuant to Section 103 of the Comprehensive

Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL. A review of the SEMS list, as provided by EDR, and dated 07/26/2022 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

- **INDIAN UST:** A listing of underground storage tank locations on Indian Land. A review of the INDIAN UST list, as provided by EDR, has revealed that there is 1 INDIAN UST site within approximately 0.25 miles of the target property.
- **INDIAN RESERV:** This map layer portrays Indian administered lands of the United States that have any area equal to or greater than 640 acres. A review of the INDIAN RESERV list, as provided by EDR, and dated 12/31/2014 has revealed that there is 1 INDIAN RESERV site within approximately 1 mile of the target property.

A review of the following listed databases within Table 3 did not yield any sites within 1 mile from the subject site. To ensure that all possible information sources were reviewed, local agencies were also checked for sites located on the property in question in addition adjacent properties. These agencies were listed previously in Table 1. The history section of this audit summarizes any information obtained by reviewing the local record sources.

Table 3. Agency databases with no sites found within 1 mile of subject site.

Record Type	Environmental Record
Standard Environmental Records	Federal NPL List: NPL, Proposed NPL, NPL LIENS, Delisted NPL
	Federal CERCLIST List: Federal Facility, SEMS-ARCHIVE
	RCRA CORRACTS Facilities: CORRACTS
	RCRA non-CORRACTS TSD Facilities: RCRA-TSDF
	RCRA Generators: RCRA-LQG, RCRA-SQG, RCRA-VSQQ
	Federal Institutional Controls / Engineering Controls Registries: LUCIS, US ENG CONTROLS, US INST CONTROLS
	Federal ERNS List: ERNS
	Lists of State and Tribal Hazardous Waste Facilities: SHWS
	State and Tribal Landfill and/or Solid Waste Disposal Sites: SWF/LF
	State and Tribal Leaking Underground Storage Tanks: LUST, INDIAN LUST
	State and Tribal Registered Storage Tank Lists: FEMA UST, AST

	State and Tribal Voluntary Cleanup Sites: VCP, INDIAN VCP
	State and Tribal Brownfields Sites: BROWNFIELDS
Additional Environmental Records	Local Brownfield Lists: US BROWNFIELDS
	Local Lists of Landfill / Solid Waste Disposal Sites: SWRCY, INDIAN ODI, DEBRIS REGION 9, ODI, IHS OPEN DUMPS
	Local Lists of Hazardous Waste / Contaminated Sites: US HIST CDL, US CDL
	Local Land Records: LIENS 2
	Records of Emergency Releases Reports: HMIRS
	Other Ascertainable Records: RCRA NonGen / NLR, FUDS, DOD, SCRCD DRYCLEANERS, US FIN ASSUR, EPA WATCH LIST, 2020 COR ACTION, TSCA, TRIS, SSTS, ROD, RMP, RAATS, PRP, PADS, ICIS, FTTS, MLTS, COAL ASH DOE, COAL ASH EPA, PCB TRANSFORMER, RADINFO, HIST FTTS, DOT OPS, CONSENT, FUSRAP, UMTRA, LEAD SMELTERS, US AIRS, US MINES, ABANDONED MINES, FINDS, ECHO, UXO, DOCKET HWC, FUELS PROGRAM, AIRS, COAL ASH, Financial Assurance, HMRI, NPDES, MINES MRDS
EDR High Risk Historical Records	EDR Exclusive Records: EDR MGP, EDR Hist Auto, EDR Hist Cleaner
EDR Recovered Government Archives	Exclusive Recovered Government Archives: RGA HWS, RGA LF, RGA LUST

3. History and Ownership

The subject site consists of approximately 1.0 acres or 45,000 square feet of developed land with one partially abandoned structure estimated at 13,000 square feet and an open storage yard estimated at 3,000 square feet. The site was historically a tribal schoolhouse that now functions mostly as an equipment storage space for the tribal departments. It is unknown when the school was relocated, and the structure decommissioned. The Tribe has additionally expressed interested in preserving the structure for its cultural and historic significance. Construction date records were unable to be located; however, aerial photos indicate that it was built prior to 1948. County assessor's office records were unavailable due to the subject site's location on tribal lands.

3.1. Sanborn Fire Insurance Map Review

To obtain additional historical information on the property Sanborn fire insurance maps were obtained and reviewed. The Sanborn Library includes more than 1.2 million fire insurance maps

from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others which track historical property usage in approximately 12,000 American cities in towns. Collections searches include the Library of Congress, University Publications of America, and EDR Private Collection. This report is included in Appendix A, showing that no fire insurance maps were found for the property.

3.2. Site Reconnaissance and Interview

An initial site visit of multiple Brownfields locations on Walker River Tribal lands was performed on January 3, 2019, with a follow-up site visit performed on July 14, 2022. The old school is located within the town of Schurz, NV near Cottonwood Lane and the intersection of Hospital Road and Veterans Memorial Highway (Figure 4). All entrances to the building and open storage yard were secured with locks or boarded shut. While the old school's structural foundation appeared to be largely solid, much of the building's exterior paint and roofing was observed to be in a deteriorated condition (Figure 5, Figure 6, and Figure 7).

The fenced courtyard area is used by the Walker River Tribal departments for the storage of equipment and miscellaneous materials (Figure 8). A slightly elevated concrete walkway partially stretches around the perimeter of the courtyard (Figure 9) with a staircase leading down to the basement level located on the west side of the courtyard (Figure 10). The basement was observed to contain the old school's boiler room (Figure 11). At the first floor level, several classroom and kitchen areas were inspected and noted to have potential asbestos hazards (Figure 12, Figure 13, and Figure 14). Some additional areas of the old school were not inspected due to structural uncertainties or inaccessibility at the time of the site visit. The building's paint coating appeared to be flaking in many areas and is a potential lead paint hazard (Figure 15 and Figure 16).

Figure 4. Northeast exterior side and main entrance to the old Walker River school house.

Figure 5. West side of the old school showing deteriorated roofing and paint.

Figure 6. Far east side of the old school showing boarded windows and deteriorated paint.

Figure 7. Boarded entrance to the structure in the previous figure (east side of the old school).

Figure 8. View looking southwest at the fenced courtyard area used for materials storage.

Figure 14. Historic oven and stovetop appliances located in the old school's kitchen area.

Figure 15. Potential lead paint hazard from flaking on the building's exterior brick walls.

Figure 16. Potential lead paint hazard from flaking on the siding of the building in Figure 6

4. Physical Setting and Environmental Findings

4.1. Geological and Hydrological Characteristics

The town of Schurz is wholly located in the Walker River Reservation and within an alluvial valley of the Walker River system. The region is surrounded by the Wassuk Mountain Range to the west, the Calico Hills and Agai Pah Hills to the east, Weber Reservoir to the north, and Walker Lake to the south. The subject site is situated in the floodplain and approximately 500 feet southwest of the Walker River. The elevation of the subject site is approximately 4,126 feet above sea level, with slope estimated at less than 10 percent. Regional vegetation consists of northern Great Basin shrub species, such as basin big sagebrush and bitterbrush, and grasslands of cheatgrass and mixed perennial grasses. Numerous cottonwood trees were additionally observed near the subject site.

The regional groundwater system generally flows north to south parallel to the Walker River and west to east from the Wassuk Mountain Range. Generally, shallower depth to groundwater is related to proximity to the river. The groundwater flow direction in the vicinity of the property is assumed to be primarily from the east. Depth to groundwater is estimated to be approximately 10 to 70 feet below land surface (BLS) in the area near and beneath the subject site, according to the Nevada Division of Water Resources online Well Log Database.

4.2. Environmental Concerns

Environmental records found by the EDR radius search include six underground storage tank (UST) and a Superfund Enterprise Management System (SEMS) site. The USTs are all diesel or gasoline tanks located at the One Horse Station approximately 1,200 feet southeast and down-gradient of the subject site. Records show the tanks were installed prior to 1988 and are listed by the EDR as having a status of “permanently out of use”. The size and ID of the tanks are as follows:

Tanks 1 and 2: gasoline with a capacity of 750 gallons

Tank 3: gasoline with a capacity of 1,000 gallons

Tank 4: diesel with a capacity of 2,000 gallons

Tank 5: diesel with a capacity of 6,000 gallons

Tank 6: gasoline with a capacity of 5,000 gallons

It is unknown if the tank contains any leftover fuel; however, it was most likely pumped empty when the facility was abandoned and therefore presents little contamination hazard to groundwater.

The SEMS record is labeled by the EDR as “Walker River Paiute Drums” and is located 0.5 miles northwest and up-gradient of the subject site. The SEMS site ID is 0905870 and it is listed as “not on the NPL” and “Removal Only Site (No Site Assessment Work Needed)”. Appendix E contains more information about these records as well as the additional environmental records searched.

Due to the age of the structure, there is a likely presence of hazardous asbestos and lead paints.

4.3. Soil Conditions

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the National Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining, and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed soil survey maps called SSURGO: or the Soil Survey Geographic Database Source: Department of Agriculture, Natural Resources Conservation Service (NRCS). SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizes duplicates that come from original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

There are three soil classifications on and near the target site:

- Slaw – silt loam, Class C hydrologic group: slow infiltration rates with layers impeding the downward movement of water, soils with moderately fine or fine textures. The soil drainage class is listed as well drained. The depth to the water table is greater than 0 inches and the minimum depth to bedrock is greater than 0 inches.
- Fallon – sand, Class C hydrologic group: slow infiltration rates with layers impeding the downward movement of water, soils with moderately fine or fine textures. The soil drainage class is listed as somewhat poorly drained. The depth to the water table is greater than 130 inches and the minimum depth to bedrock is greater than 0 inches.
- Inmo – very gravelly loamy sand, Class A hydrologic group: high infiltration rates with deep soils and well drained to excessively well drained sands and gravels. The soil drainage class is listed as excessively drained. The depth to the water table is greater than 0 inches and the minimum depth to bedrock is greater than 0 inches.

4.4. Water Wells in the Project Area

A Nevada State Wells database was reviewed as part of this investigation. Currently, there are 0 state wells within 0.5 miles of the subject site.

A PWS is any public water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers, and other sources. There are 13 PWS locations within 0.5 miles of the subject site.

USGS Water Sites are listed in the USGS National Water Inventory System (NWIS). This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater. There is 1 USGS Water site within 0.5 miles of the target property.

There are numerous wells located within a 1-mile radius of the site, including 43 State Wells and 9 USGS Wells (Figure 23). Appendix D contains information on all the known wells in the study area. There are 14 total water wells located within 0.5 miles of the site with attendant information listed in Appendix D.

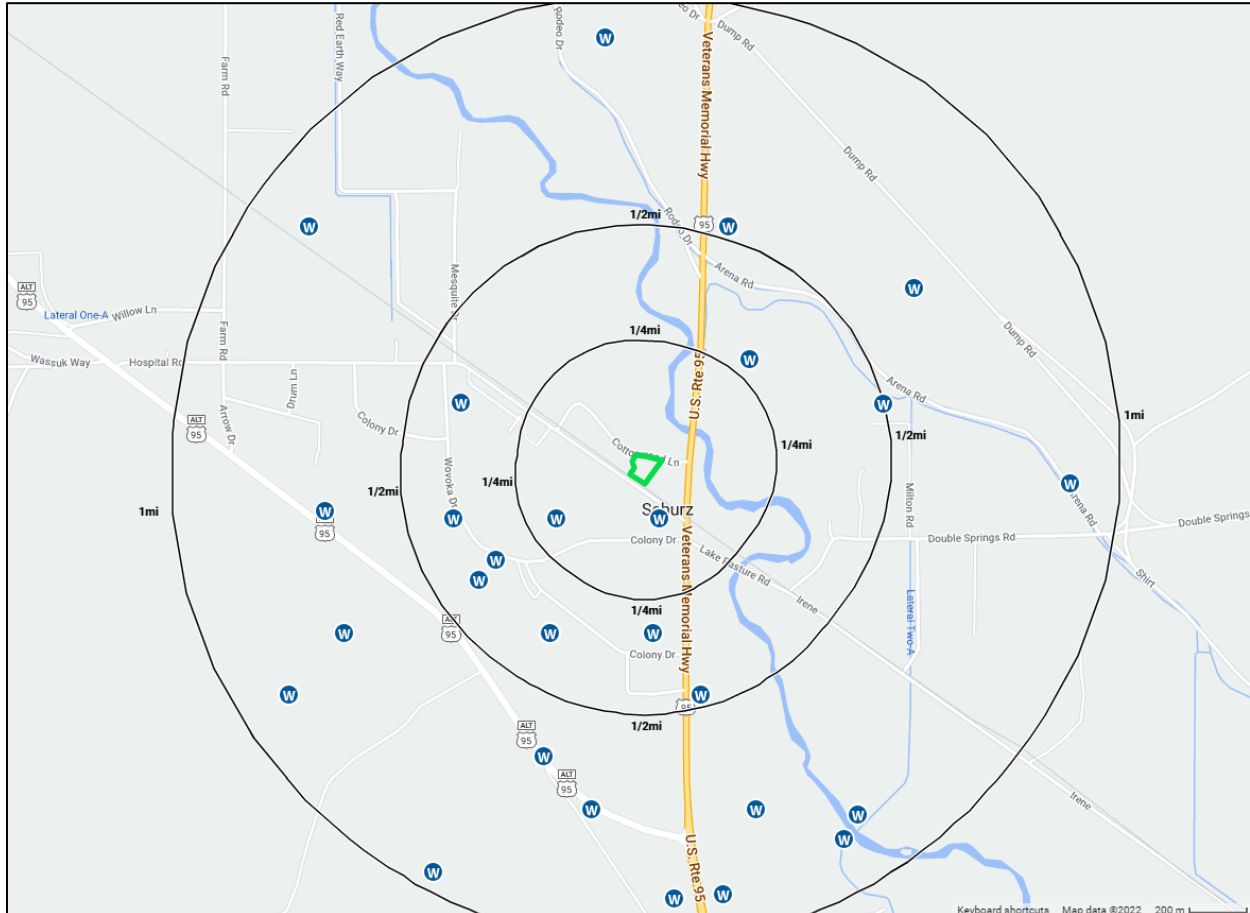

Figure 17. Wells within 1 mile of the subject site.

5. Findings and Conclusions

This Phase I Environmental Site Assessment (ESA) was performed in conformance with the American Society for Testing and Materials (ASTM) Practice version E1527-13 (“Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process”). The subject site was one derelict structure on the Walker River Reservation known as the “old school”.

The purpose of the assessment was to identify recognized environmental conditions in connection with the subject property. Recognized environmental conditions are defined by ASTM E1527-13 as the likely presence of any hazardous substance or petroleum products on a property under conditions that indicate an existing, past, or material threat of a release of hazardous substances or petroleum products into structures or into the ground or groundwater of the property. This report was prepared to constitute appropriate inquiry into the previous ownership/lessees and uses of the

subject parcels consistent with good commercial and customary practice. The information was gathered using records that were reasonably available as per ASTM E1527-13 guidelines.

As part of the environmental site assessments for the subject parcels, adjacent parcels surrounding the project area were also considered in this study. Historical and regulatory records were reviewed for these adjacent parcels and a visual reconnaissance was performed from the public right-of-way. In addition, regulatory review of properties within applicable minimum search distances as set forth in ASTM E1527-13 was used to identify any past or present regulatory concerns in these outlying areas.

RECs were noted for this property regarding the likely presence of materials containing asbestos and lead paint. The abandoned fuel tanks located near the subject site are of additional concern and may warrant remediation activities. Further investigation and testing are recommended.

6. Certifications

All the findings and conclusions presented in this report have been made based upon the information gathered by the Environmental Professional and the Environmental Data Resources report in conformance with the guidelines set forth in ASTM designation E1527-13. We hereby certify that we are responsible for the services described in this document and for its preparation. The services described in this document have been provided in a manner consistent with the standards of the profession and to the best of our knowledge comply with all applicable federal, state and local statutes, regulations and ordinances. We declare that, to the best of our professional knowledge and belief we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR § 312” and 12.13.2. Appendix F contains curriculum vitae summarizing experience as required in E1527-13. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by McGinnis and Associates LLC were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

USGS TOPOGRAPHIC MAP

Target Property Map:	11954609 SCHURZ, NV
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Additional Panels in search area: FEMA Source Type

Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property
SCHURZ NE

NWI Electronic Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Slaw

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 7.8 Min: 6.6
2	9 inches	40 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 7.8 Min: 6.6
3	40 inches	59 inches	stratified sand to silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 7.8 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Fallon

Soil Surface Texture: sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 130 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	sand	Granular materials (35 pct. or less passing No. 200), Fine Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6
2	14 inches	59 inches	stratified sand to silt loam	Granular materials (35 pct. or less passing No. 200), Fine Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6

Soil Map ID: 3

Soil Component Name: Inmo

Soil Surface Texture: very gravelly loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	very gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 705 Min: 141	Max: 9.6 Min: 7.9
2	7 inches	40 inches	stratified extremely gravelly coarse sand to very gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 705 Min: 141	Max: 9.6 Min: 7.9
3	40 inches	59 inches	very gravelly loamy coarse sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 705 Min: 141	Max: 9.6 Min: 7.9

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 07/26/2022 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
WALKER RIVER PAIUTE	1021 HOSPITAL RD.	WNW 1/4 - 1/2 (0.494 mi.)	2	10

Lists of state and tribal registered storage tanks

INDIAN UST: A listing of underground storage tank locations on Indian Land.

A review of the INDIAN UST list, as provided by EDR, has revealed that there is 1 INDIAN UST site

EXECUTIVE SUMMARY

within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

INDIAN RESERV: This map layer portrays Indian administered lands of the United States that have any area equal to or greater than 640 acres.

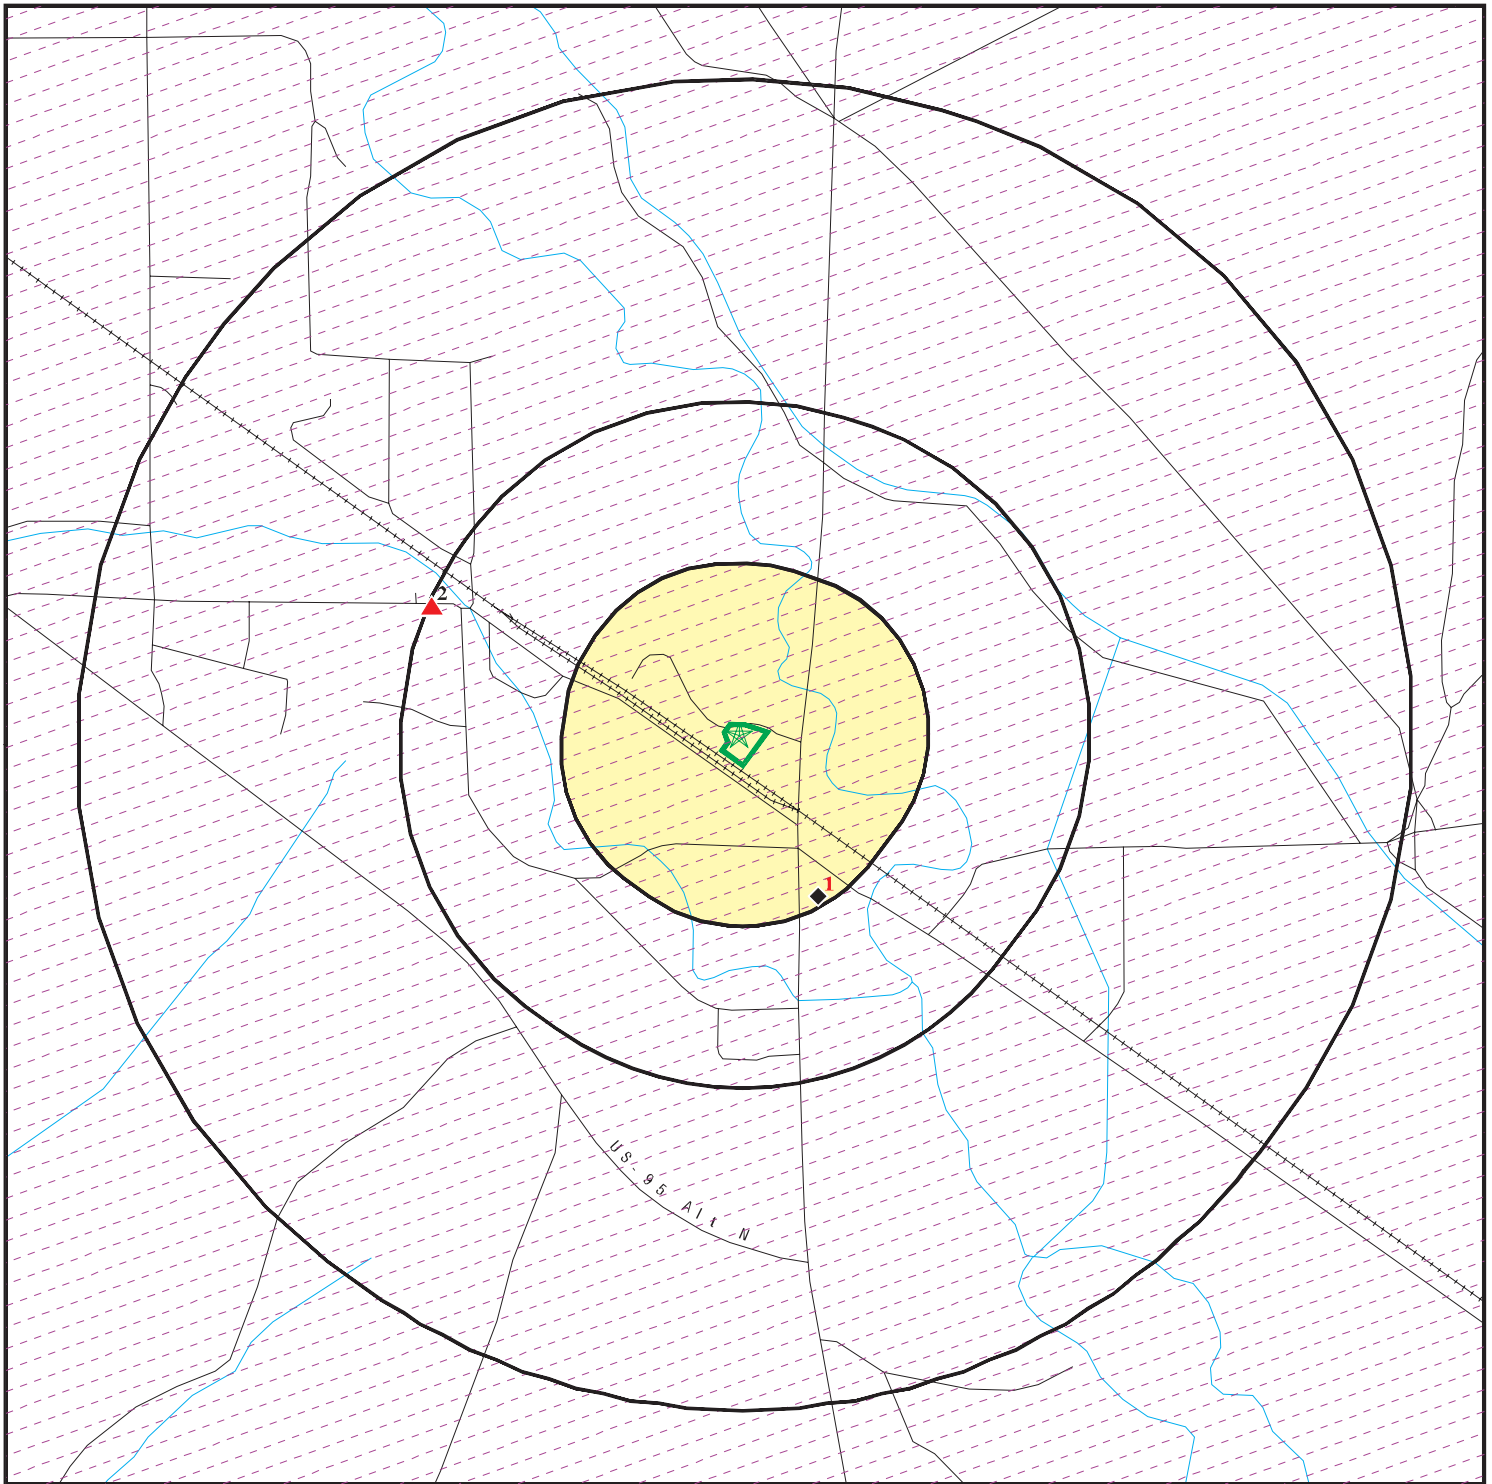

A review of the INDIAN RESERV list, as provided by EDR, and dated 12/31/2014 has revealed that there is 1 INDIAN RESERV site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
WALKER RIVER RESERVA		0 - 1/8 (0.000 mi.)	0	8

EXECUTIVE SUMMARY

There were no unmapped sites in this report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/26/2022	Source: EPA
Date Data Arrived at EDR: 08/02/2022	Telephone: N/A

Number of Days to Update: 20	Next Scheduled EDR Contact: 10/10/2022
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/26/2022	Source: EPA
Date Data Arrived at EDR: 08/02/2022	Telephone: 800-424-9346

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/20/2022	Source: Environmental Protection Agency

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/20/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/21/2022	Telephone: (415) 495-8895
Date Made Active in Reports: 06/28/2022	Last EDR Contact: 06/21/2022
Number of Days to Update: 7	Next Scheduled EDR Contact: 10/03/2022
	Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/20/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/21/2022	Telephone: (415) 495-8895

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/16/2022	Source: Department of the Navy
Date Data Arrived at EDR: 05/19/2022	Telephone: 843-820-7326
Date Made Active in Reports: 07/29/2022	Last EDR Contact: 08/03/2022
Number of Days to Update: 71	Next Scheduled EDR Contact: 11/21/2022
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 05/16/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/24/2022	Telephone: 703-603-0695
Date Made Active in Reports: 07/29/2022	Last EDR Contact: 08/17/2022
Number of Days to Update: 66	Next Scheduled EDR Contact: 12/05/2022
	Data Release Frequency: Varies

US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 05/16/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/24/2022	Telephone: 703-603-0695
Date Made Active in Reports: 07/29/2022	Last EDR Contact: 08/17/2022
Number of Days to Update: 66	Next Scheduled EDR Contact: 12/05/2022

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 06/14/2022	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 06/15/2022	Telephone: 202-267-2180
Date Made Active in Reports: 06/21/2022	Last EDR Contact: 06/15/2022
Number of Days to Update: 6	Next Scheduled EDR Contact: 10/03/2022
	Data Release Frequency: Quarterly

Lists of state- and tribal hazardous waste facilities

SHWS: Sites Database

A listing of correction action sites.

Date of Government Version: 06/13/2022	Source: Department of Conservation and Natural Resources
Date Data Arrived at EDR: 06/14/2022	Telephone: 775-687-5872
Date Made Active in Reports: 08/31/2022	Last EDR Contact: 06/14/2022
Number of Days to Update: 78	Next Scheduled EDR Contact: 09/26/2022
	Data Release Frequency: Semi-Annually

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: Landfill List

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 05/24/2022	Source: Department of Conservation and Natural Resources
Date Data Arrived at EDR: 05/25/2022	Telephone: 775-687-5872

Lists of state and tribal brownfield sites

BROWNFIELDS: Project Tracking Database

Brownfields sites included in the Project Tracking Database. The term "brownfields" is used to describe abandoned, idled, or underused industrial or commercial properties taken out of productive use because of real or perceived risks from environmental contamination. The State of Nevada has initiated Brownfields, a land-recycling program, to provide an opportunity to redevelop these undesirable properties and revitalize communities.

Date of Government Version: 06/13/2022	Source: Division of Environmental Protection
Date Data Arrived at EDR: 06/14/2022	Telephone: 775-687-9384

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

	Data Release Frequency: Quarterly

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

B. DIETRICK MCGINNIS, Ph.D, PE, CEM**President, McGinnis and Associates**

Phone/fax (775) 853.0449 fax 0243, dmcginnis@mcginnisandassociates.com

65 Regency Way Suite C, Reno, NV 89509

Education

- Ph.D. Civil Engineering. University of Nevada, Reno. 1998. Dissertation Title “Degradation of Ethylene Glycol by Dye-Sensitized and Hydroxyl Radical Oxidation”. E. Joe Middlebrooks, advisor (retired).
- M.S. Civil and Environmental Engineering. Utah State University. Logan, Utah. 1995. Thesis Title “Biocontainment of Hydrocarbons in a Shallow Aquifer”. R. Ryan Dupont, advisor.
- B.S. Wood Science and Technology. Mississippi State University. Starkville, Mississippi. 1990. Senior Thesis “Determination of Pentachlorophenol Retention by X-Ray Fluorescence Using Split Borings from Treated Southern Yellow Pine Poles”.

Work Experience

President, McGinnis and Associates, LLC, Reno, NV, 1989 to present.

- Government to government relation assignments including experience with Tribal Governments, NRDA, and Superfund technical support.
- Watershed and wetland planning and restoration including infrastructure/road rehabilitation.
- Providing economic, energy and environmental program development support for Tribes and Local Governments.
- Implementing site cleanup activities including site characterization and assessment. Assignments include managing contractors and working with federal and state regulatory agencies.
- Support for monitoring programs for water, soil, biota and air including radiological and pesticide assessments and drinking water/wastewater systems.
- Design and implementation of BMPs for Non-point pollution prevention including SWPPP.

Assistant Research Professor, University of Nevada, Reno, 1998.

- Developed funding resources and research initiatives for the National Disaster Resource Center for Wood Structures, a partnership between the USDA Forest Products Laboratory, the University of Nevada, Reno, the University of North Dakota and Michigan Technological University.
- Coordinated with lobbyist from member universities for direct appropriations; an earmark successfully placed on the 1999 budget sponsored by Senators Reid and Dorgan.

Research Assistant University of Nevada, Reno, Department of Civil Engineering, (1995-1998). In addition to Ph.D. research responsibilities:

- Maintained and performed analysis on multiple ICP, high performance liquid chromatography, ion chromatography and gas chromatography units.

Research Assistant, Utah State University, Department of Civil and Environmental Engineering, Logan, Utah (1992-1994). In addition to M.S. research responsibilities:

- Maintained and performed analysis for metals on Perkin Elmer Inductively Coupled Plasma units.
- Developed methods for and performed analysis with high performance liquid chromatography, ion chromatography and gas chromatography (flame ionization and electron capture detectors) units.

Summer Internship, International Paper. Wiggins, MS, Deridder, LA, and Joplin, MO (1989).

- Development of quality control methods for PCP treated poles at multiple plants.
- Development of X-Ray Fluorescence methods for in-plant and field use.

Laboratory Technician, Mississippi State Chemical Labs, Miscellaneous Lab, Mississippi State University, Starkville, MS, March 1984 to October 1990.

- Conducted general drinking water quality and wastewater permit analyses.
- Developed procedures for food and beverage quality testing and labeling, including analyses for specific phosphorus compounds, product tampering, nutritional value and a variety of specialty analyses that involved adapting procedures from several sources.

Consulting Experience

2016-2017	Regulatory and Technical Support, Jackpile Mine in Laguna Pueblo, New Mexico. Subcontract with EA for Region 6 U.S. EPA.
2015-2017	Regulatory and Technical Support, Tronox Navajo Area Uranium Mines, San Mateo Creek Basin, New Mexico. Subcontract with Weston for Region 6 U.S. EPA.
2012-2017	CEM, Mohave Generating Plant, Laughlin, NV for Hamilton Geotech/Southern California Edison
2000-2016	Technical support for the Yerington Paiute Tribe Environmental Program. Yerington, NV. Tasks include review of work plans and data/data validation relating to the Anaconda Mine Superfund Site and participation in the Technical Working Group. (current project)
2009-2016	Caseworker for the Yerington Paiute Tribe. Yerington Mine Natural Resources Trustee Council. (current project)
2014-2016	Technical support for wetland restoration and erosion control. La Posta Rancheria, San Diego County, CA. (current project).
2015-2016	Technical support, Climate Change Planning Program for the 27 Tribes of Nevada, Inter-Tribal Council of Nevada (current project)
2016	Technical support, development of gravel resources on the Round Valley Tribes Reservation, Covello, CA. (current project)
2014-2016	Technical Advisor for the Elem Indian Colony, Sulphur Bank Mercury Mine Superfund Site. Lake County, CA.
2014-2016	Technical Advisor for the Elem Indian Colony, USFW TWG and GAP EPA programs. Lake County, CA.
2006-2016	Technical Advisor for CLLEAN under their Superfund Technical Assistance Grant (TAG) for the Lowery Landfill Superfund site. Aurora, CO. Responsibilities include review of PRP generated data describing groundwater plumes of heavy metals and chlorinated solvents including PCE in residential/commercial areas.
2007-2015	Groundwater modeling and support for water resource management. Habematolel Band of Pomo Indians. Upper Lake, CA.
2010-2014	Implementation and management of the Hitch Adaptive Management Plan. Habematolel Band of Pomo Indians. Upper Lake, CA. Funded through the U.S. FW Tribal Wildlife Program.
2011-2014	WAPA negotiation and energy development consultant, Hoopa Valley Tribe, Hoopa, CA.
2012-2013	Strategic Energy Planning program consultant, Lower Brule Sioux Tribe, Lower Brule, ND.
2012-2013	Development of a BIA IRMP. Big Sandy Rancheria, Auberry, CA.
2010-2011	Development of a Strategic Energy Plan for the Hoopa Tribe, Hoopa, CA. Included integration of Superfund Sites, Endangered Species and cultural sites into energy planning.

2009-2010	Project Manager, Linden Fields 50 MW Solar Farm development for Sunkiss Solar.
2009-2010	QAPP development and implementation of a legacy pesticide investigation, Habematolel Band of Pomo Indians. Upper Lake, CA..
2009	Development of biomass energy projects for Robinson Rancheria (subcontracted by Pacific Plains Engineering).
2008	Business development for Native Solar, an alternative energy economic development and jobs program for the Scotts Creek Band of Pomo Indians.
2007-2009	Septic system rehabilitation, Big Valley Rancheria water treatment plant. Lakeport, CA.
2007-2008	Development of DOE based Strategic Energy Plans for the 6 Tribes of Lake County CA. Robinson Rancheria, managing Tribe.
2007-2008	Evaluation and re-design of municipal wastewater treatment facilities. Big Valley Rancheria, Lakeport, CA.
2006-2007	Wetland and road/erosion repair for 319 and FEMA project support. Robinson Rancheria, Nice, CA.
2004-2011	Program development, technical support and data validation for water quality monitoring for metals and general water quality parameters, Elem Colony, Clearlake Oaks, CA, Sulphur Bank Superfund Site.
2004-2012	Technical Advisor for Clear Lake Environmental Action Network (CLEAN) under their Superfund Technical Assistance Grant (TAG) for the Sulphur Bank Mine site. Clearlake Oaks, CA.
2007-2008	Development of a DOE First Steps energy program for 5 federally recognized Tribes of Lake County.
2005-2006	Review and report on Geothermal Incorporated Landfill Site Remediation Program, Middletown Rancheria, Middletown, CA, a site that included heavy metals and chlorinated solvents.
2006	Fish Passage Reconnaissance: A discussion of fish barrier issues on Middle Creek, Lake County California, including engineering notes and observations from a site review of the Kelseyville fish ladder.
2006	Biological Assessment Robinson Rancheria Fee Lands, Robinson Rancheria Band of Pomo Indians Lake County, California.
2004-2006	Pesticide Circuit Rider Project, Lake County Tribes. Coordinated by the Big Valley Rancheria, Lakeport, CA.
2005-2006	Copper and lead program compliance in drinking water. Big Valley Public Works, Big Valley Rancheria, Lakeport, CA.
2005	Technical support for Mountain Electronics Recycling Systems including CDBG grant development. Quincy, CA.
2004	Economic analysis and technical report for Ecofirst, an electronics recycling company. Plumas County, CA.
2004	Program development and assistance for water quality, sediment and biota monitoring for metals and pesticides for Big Valley Rancheria, Lakeport, CA.
2004	Development of a Non-point source program and report for the Middletown Rancheria, Middletown, CA.
2004	Development of a water monitoring QAPP for the Robinson Rancheria, Nice, CA.
2003	Preparation of Solid Waste grants and TEP for the Fort McDermitt Paiute - Shoshone Tribe.
2003	Preparation of a water monitoring QAPP for the Elem Rancheria, Clearlake Oaks, CA.
2003	Preparation of a 305b Report for the Elem Rancheria including review of the Sulfur Bank Superfund Site Data, Clearlake Oaks, CA.
2002	Assistance with review of road and infrastructure planning, Bear River Band of Rohnerville Rancheria. Loleta, CA.
2002	Technical support for development of an Environmental Inventory and Tribal Environmental Plan for the Guidiville Band of Pomo Indians. Ukiah, CA.
2002	Removal of home heating oil tanks, Fort McDermitt Paiute - Shoshone Tribe Reservation.

2000-2002	Technical advisor for the Yerington Paiute Air Quality Program. Yerington, NV. Design and management of systems to monitor for PM ₁₀ , PM _{2.5} and toxic emissions.
2000-2001	Improving water quality in the Carson River, Consultant for the University of Nevada, Reno for a subcontract to the Washoe Tribe of Nevada and California (USEPA 319 Grant).
2000-2001	Experimental design and statistical analysis of results for heavy metal determinations and Candida growth factors in human breast milk. For Health and Nutrition Inc. Reno, NV.
2000-2002	Development of a rural internet provider business model including application of wireless internet technology. For Plumasnet. Greenville, CA.
2000	Prioritizing environmental projects for the Ft. McDermitt Paiute and Shoshone Tribe (NV). Sites include mines/acid mine drainage, underground storage tanks and water quality issues.
2000	Assessment of a drinking water collection and distribution system for the Greenville Rancheria. Greenville, CA.
1999	Design for proposed facilities for onsite treatment of waste from lemon processing, Buenos Aires, Argentina. For Obrelmec (Division Ecologia).
1999	Design for proposed facilities for offsite treatment of photographic film development waste, Buenos Aires, Argentina. For Obrelmec (Division Ecologia).
1999	Evaluation of an electrolytic cell system for spa sanitation in conjunction with Dr. Dean Adams, University of Nevada, Reno, Department of Civil Engineering, for Bioquest Inc.
1993-1999	Production of specialty agar for plate counting PCP and Creosote tolerant bacteria. Included design and start-up of onsite laboratory, Weed, California, for JH Baxter Inc.
1998	Design and monitoring of onsite facilities for biodegradation of DDT contaminated soil, Santiago del Estero, Argentina. In conjunction with Obrelmec (Division Ecologia).
1996-1998	Production of specialty agar for plate counting PCP and Creosote tolerant bacteria. Included design and start-up of onsite laboratory, Lumby, British Columbia, Canada. For Bell Pole, Ltd.
1996-1997	Design of primary treatment systems for a combined industrial wastewater treatment system that included dye, petroleum and metals processing waste, Ahmedabad, India. For Envirocare.
1993	Design and testing of an insitu air venting system for treatment of PCP contaminated soil and water, Lake City, Florida. In conjunction with Wildmere Farms.
1993	Review of results and literature review for a three dimensional resistivity geophysical testing for creosote contamination. For the Hattiesburg, MS, School Board through representing attorney.
1993-1996	Design and operation of vented soil pile systems for treatment of PCP and PAH contaminated soil at an abandoned wood treating site, Lake City, Florida. In conjunction with Wildmere Farms.
1990-1992	Design and operation of landfarms for bioremediation of PCP contaminated soil at an abandoned wood treating site, Lake City, Florida. In conjunction with Wildmere Farms.
1989	Monitoring bioremediation system for soil contaminated with Dieldrin at various operating forest products facilities in Southern Arkansas. For Champion Lumber, Inc.

Participation in Professional Organizations and Seminars

- Professional Engineer (PE) Nevada 16257
- Certified Environmental Manager, State of Nevada, EM-1785
- Hazardous Waste Operations and Emergency Response Training (HAZWOPPER) in accordance with 29 CFR 1910.120. Truckee Meadow Community College, January 10-14, 2005. Updated January 2016
- ASTM Technical & Professional Training Course on Phase I-II ESAs, November 27-29, 2012 in Las Vegas, NV. Confined Space Entry Train-the-Trainer, Truckee Meadow Community College, July 27, 2005
- Order of the Engineer

- American Water Works Association
- Yerington Mine CERCLA Site Technical Working Group
- Sulphur Bank Mercury Mine Superfund Site Technical Working Group
- Lowery Landfill Superfund Site Technical Working Group
- *National Tribal Environmental Enforcement Conference*. April 30 – May 2, 2002. Reno, NV
- *Working effectively with Federal and State Agencies, A workshop for Tribal Council Members, Employees and Representatives* (Topics included Federal Indian Law and Consultation). August 8-11, 2000. Reno, Nevada. Sponsored by the Nevada Indian Environmental Coalition
- *Tribal Nonpoint Source Pollution Workshop*. July 24-25, 2000, Sparks, Nevada. Sponsored by Region 9 USEPA
- Reviewer for *Chemosphere*, 2000 - 2001
- *President*. 1996. Student Association of Environmental Engineers and Scientists, University of Nevada, Reno
- *Session Chair*. 1994. Environmental Issues/Remediation in the Wood Treating Industry. ACS (Industrial and Engineering Chemistry Division, Pollution Prevention and Waste Management Subdivision) Emerging Technologies for Hazardous Waste Management Symposium VI, Atlanta, Georgia
- *Session Chair*. 1993. Environmental Issues/Remediation in the Wood Treating Industry. ACS Emerging Technologies for Hazardous Waste Management Symposium V, Atlanta, Georgia
